ALBUQUERQUE, N. MEX.

INF ONLY

4929TH TEST SQUADRON (DEVELOPMENT)  
Kirtland Air Force Base, New Mexico

23 May 1958

SUBJECT: Release of Information In Unidentified Flying  
Object Reports for Civilian Analysis and Possible  
Publication

THRU: Commander  
4929th Test Squadron (Development)  
Kirtland Air Force Base, New Mexico

TO: Office of Information Services (SAFIS)  
Secretary of the Air Force  
Washington 25, D.C.

1. In accordance with paragraph 8, AFR 200-2, dated 5 February 1958, I hereby request permission to release for civilian analysis and possible publication, my Unidentified Flying Object sighting reported to the 4679th Ground Observer Corps Squadron, Air Defense Filter Center (34th Air Division) in Albuquerque, the evening of 14 April 1958, and the sighting reported by Mr. [REDACTED] to the same unit on the evening of 21 April 1958. Justifications for approval of this request are as follows:

a. In accordance with paragraph 18, AFR 200-2, no classification is necessary to protect any information of the kinds listed, nor does any of the data reported under paragraph 15 require classification.

b. The reports do not fall into any category restricted under paragraphs 1b and 2a, AFR 190-12, dated 13 December 1956, or paragraph 3, AFR 190-16, dated 29 July 1954. Furthermore, the reports meet the requirements of paragraph 2, AFR 190-16.

c. Accordingly, I would be very grateful if, in keeping with the policy expressed in paragraph 1a, AFR 190-12 and paragraph 2, AFR 190-16, you would release the aforementioned reports as requested.

2. I would also appreciate further clarification of paragraph 11, AFR 200-2. Does this paragraph restrict military personnel from unofficially interviewing civilians who have sighted Unidentified Flying Objects, such interviews being for the purpose covered under paragraph 4a(3), AFR 190-12, which states that the military writer would have the same access to information as a civilian writer, who would not be restricted in respect to civilian interviews?

3. Above requests have been referred to you after consultation with the Office of Information Services at base level.

NO CASE

INFO ONLY

27 June 1958

Dear Sgt. [REDACTED]

This is to acknowledge your letter of 23 May 1958 concerning unidentified flying object sightings of 14 and 21 April 1958 at Albuquerque, New Mexico.

Neither of these two sightings were forwarded to the Air Technical Intelligence Center for evaluation and we have no record of these two sightings.

There are no restrictions covering your use of these sightings. Therefore, you are free to submit these to any organization you choose for analysis or evaluation and you may publish an account of these sightings if you desire.

For your information, I am inclosing the latest Department of Defense Fact Sheet on the subject of unidentified flying objects which denies the existence of any authenticated evidence to substantiate the existence of the popularly termed "flying saucers."

Sincerely yours,

Incl

"SPACESHIP" OVER DENMARK--Danish officials have appealed for witnesses to corroborate a woman's statement that she saw a "spaceship" on Apr. 15 near Broager, south Jutland. The woman described the spaceship as a big, black, low-flying object bearing on it "a white and yellow circle which seemed to move." She said that when it flew over Broager a number of horseshoe-shaped objects "emitting a strong light" issued from it. About 20 other witnesses reported seeing "a triangular spaceship" in the vicinity at the same time. One witness said he saw a "sea of flames" in the sky. A member of the Danish interplanetary Society said that in the past few days he had been "flooded" with reports of triangular spaceships and other celestial phenomena. (London, REUTERS, Apr. 19, 1958, 1130 GMT--E)

April 1958

Southend-on-Sea, Sussex, England

The photo on the left, above, was taken by Karl Magnusson in Iceland, during the solar eclipse of June 30th, 1954. This is one of a series of saucer pictures taken by Mr. Magnusson at that time. It was sent to SAUCER NEWS by Mr. Skuli Skulason of Iceland. - The photo on the right was taken in April 1958 at Southend-on-Sea, Sussex, England, by a man who prefers to remain anonymous. The saucer is said to have been traveling at a moderate speed at the time the picture was snapped. We have no further details as yet. The picture was submitted by P. B. Godfry-Bartram of Sussex, England, to whom we give our thanks.

CLOSE SIGHTING IN OHIO: Frank Dolence of Willoughby, Ohio, made a very good uccer sighting last April 1st, but was reluctant to report it, as he was afraid no one would believe him on April Fool's Day. While driving home from work at 4 a.m., he saw an object that seemed to be about 60 feet high, 50 to 60 feet across the top, 20 to 30 feet across the bottom, and shaped like an ice cream cone. It was an unusual color, between orange and red, and glowed like nothing he had ever seen before. "It appeared to be 200 feet in the air," said Dolence. "Then I drove a little further down the street I couldn't see it any more, so I drove back to my original position and it came into sight again. At that time the object was much further away, to the west." Later that night Dolence drove back to the spot with his wife and daughter, but by that time the object had disappeared.

2 APR 1958

...Columbus, Ohio  
police and military officials were at a loss last April 3rd to explain reports of a bright flying object with a long row of windows seen between 9 and 11 p.m. the previous Wednesday. Traffic on a road near Columbus was stopped as drivers halted to watch the object, which flew around the east and south sides of the city before disappearing in the west..

Elyria, Ohio

April 8, 1958; Elyria, Ohio

About 7:20 p.m. a NICAP member, (name withheld by request) sighted a round fiery object also reported in Ohio papers ~~seen by hundreds of citizens.~~ NICAP member's description said the center—between two hornlike projections—showed as an intense yellow light brilliantly illuminating a half mile area. Sparks or particles like molten metal from a Bessemer furnace seemed to come from the front and sides. Object believed to have fallen into Lake Erie.

NEW YORK

## 4 Flyers Die In Stratojet Explosion

NORTH COLLINS, N. Y., April 10—(UP)—Four crewmen perished today when a B-47 Stratojet bomber exploded in flight while attempting to refuel over this western New York community.

The sleek six-turbojet from Lockbourne, O., Air Force base was just preparing to make a refueling approach on a KC-97 propeller-driven tanker plane at 20,000 feet when it blew apart about one mile astern. The tanker was not damaged. Its crew reported seeing the wreckage hurtle earthward, but no parachutes.

Three bodies were found in one large piece of wreckage, apparently the front of the plane.

Lockbourne officials identified the dead as Maj. Harold L. Kelly, 34, aircraft commander, Eugene, Ore.; Lt. Col. John Robert Glyer, 33, pilot, Wilmington, Del.; First Lt. Richard Tellier, co-pilot, Pompano Beach, Fla., and First Lt. Albert Gene Moncla, 24, Shreveport, La., the navigator.

Moncla's body was the last to be found and identified.

Westover Air Force base in Massachusetts reported the Stratojet carried four men, with one apparently an instructor. The B-47 was flying a "normal training mission," Westover officials said.

The big bomber was not armed and did not carry any nuclear bombs.

Hundreds of residents witnessed the explosion and fiery fall of the wreckage, which scattered over a five-mile-wide area of farmland about 20 miles south of Buffalo.

A flying saucer reported from Johannesburg, South Africa, on April 11, 1958, belongs in this category. Hundreds of witnesses reported a mysterious starlike object maneuvering in the northern sky on three successive nights at speeds in excess of 2000 miles an hour. Most observers agreed that "The Thing" could not have been any known aircraft because its speed was too great; it sometimes hovered stationary in the air, and repeatedly changed color from white to red to deep scarlet. One member of an Interplanetary Club who watched it through binoculars described the UFO as saucer-shaped, with a rim like a soup plate around the edge.

Members of the Council for Scientific and Industrial Research Minitrack Station, near Johannesburg, were amused by the variety of reports on "The Thing." The mysterious object in the night skies was in fact a South African Air Force Dakota aircraft, flying back and forth so that the Minitrack Station could test the calibration of its tracking instruments. In addition to the usual navigation lights, the aircraft had carried a bright, flashing light so that it could be photographed [7a].
